Kachabazar

Introduction: Kachabazar is an e-commerce web-based software where users can purchase all kinds of daily necessary goods. This website is made for all types of users. Kachabazar is available in almost all districts in Bangladesh. There are a total of 500+ employees working. We always believe in quality products and best delivery service. Our customer service is always busy with our phone calls.

Landing Page

Landing page: This is our landing page. Users can search this website by giving input to Kachabazar or www.kachabazar.com. This page contains a search bar where users can search for their necessary products, a location selector, a language selection option where users can select their language, a cart where the user can add their goods, and a login button where users can log in. On the left side, there is a menu bar and a login button. And in the flutter, there is a bottom bar. If a user didn't register the website before he/she had to register the website first. Then he/she can log in to the website easily. If the user clicks the login button then the registration page will appear.
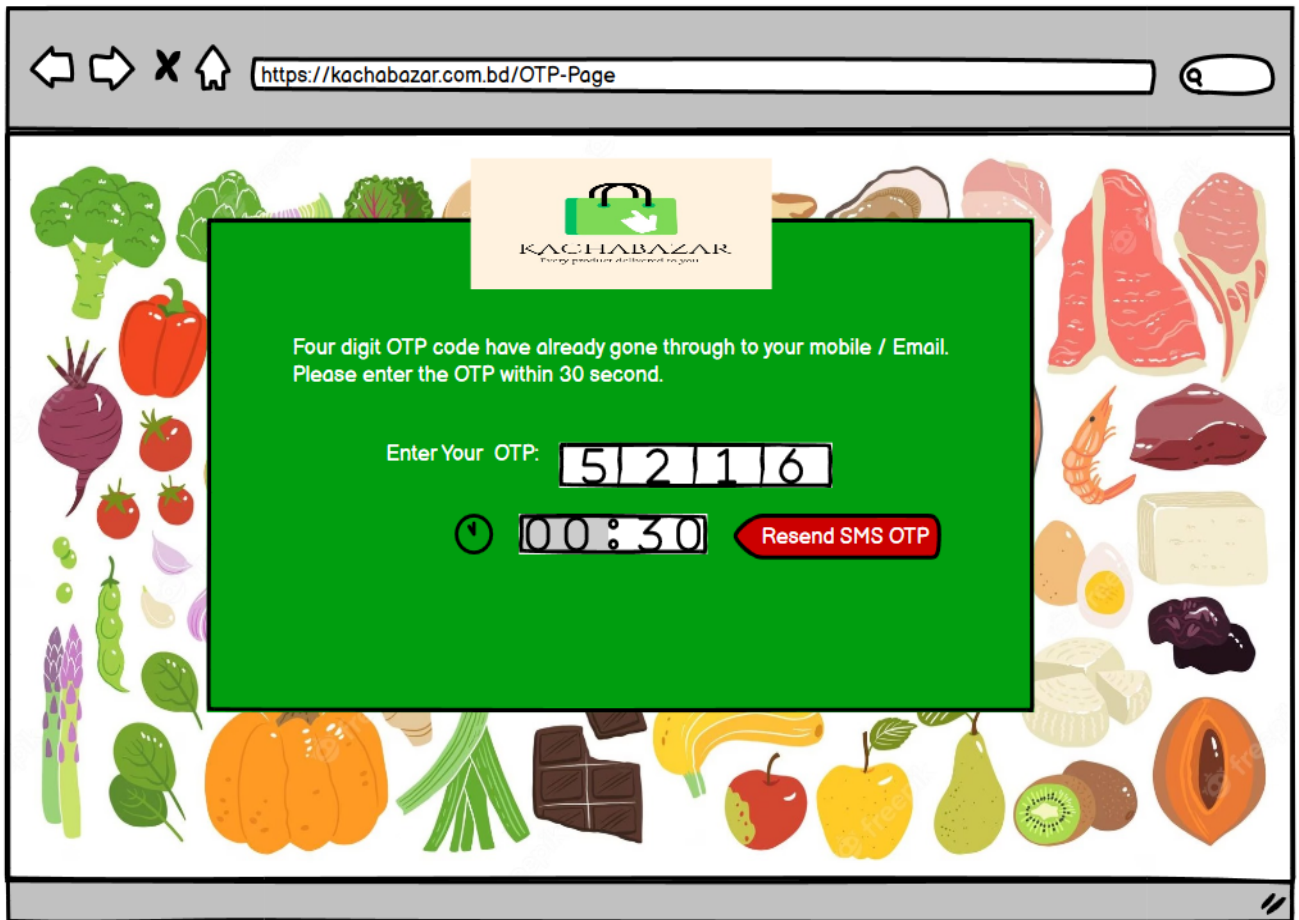

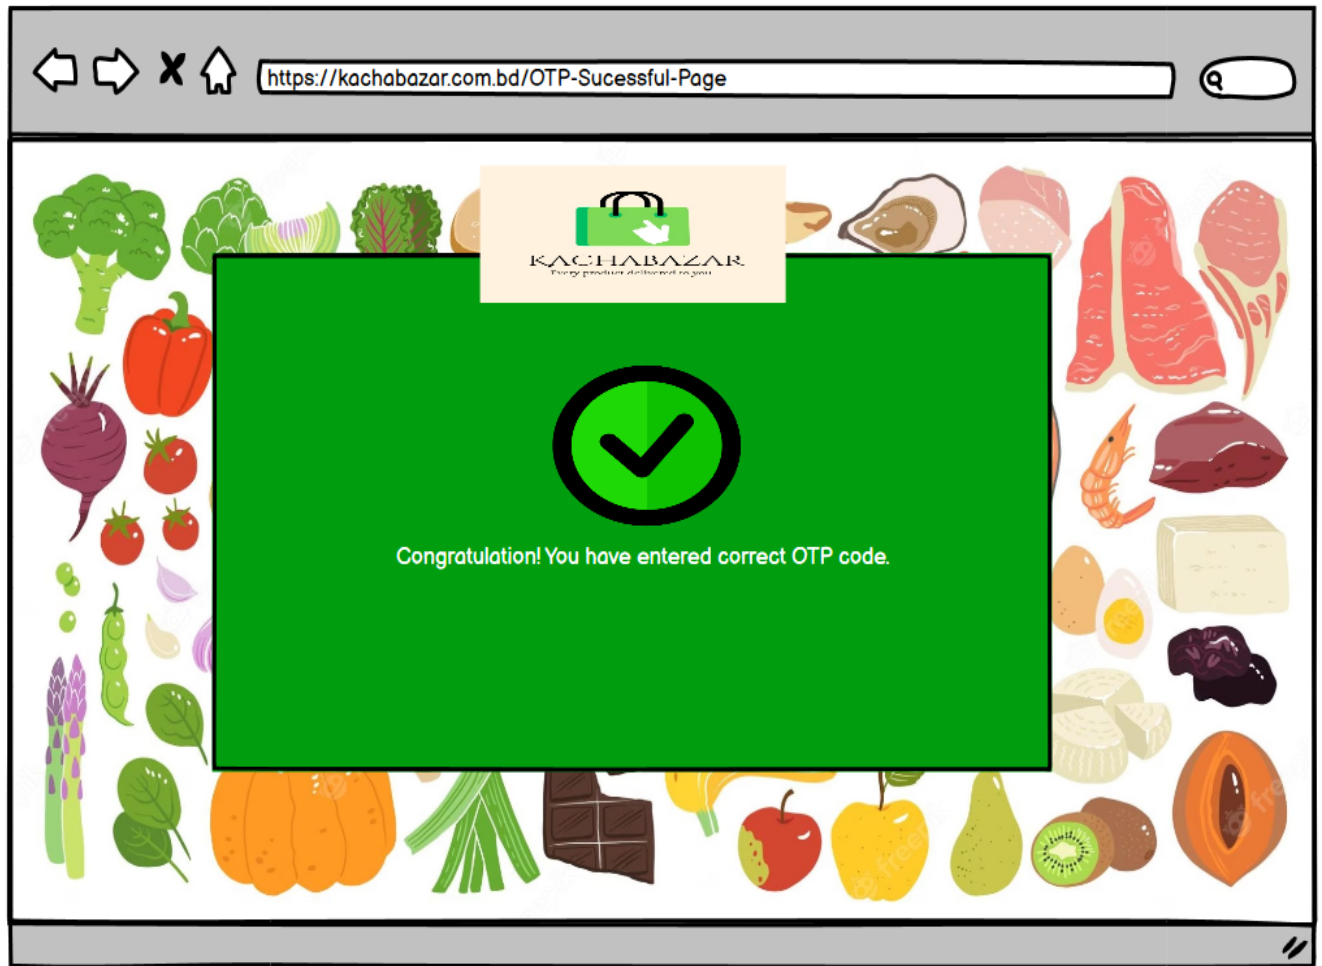

Registration page

Registration page: On the Registration Page, users have to register Kachabazar by using their credentials. The input fields are First name, Last name, E-mail, Contact no, password, and Gender. They have to fill up all the fields. All fields are required. After registering the website an OTP code will come to my mobile/ email.
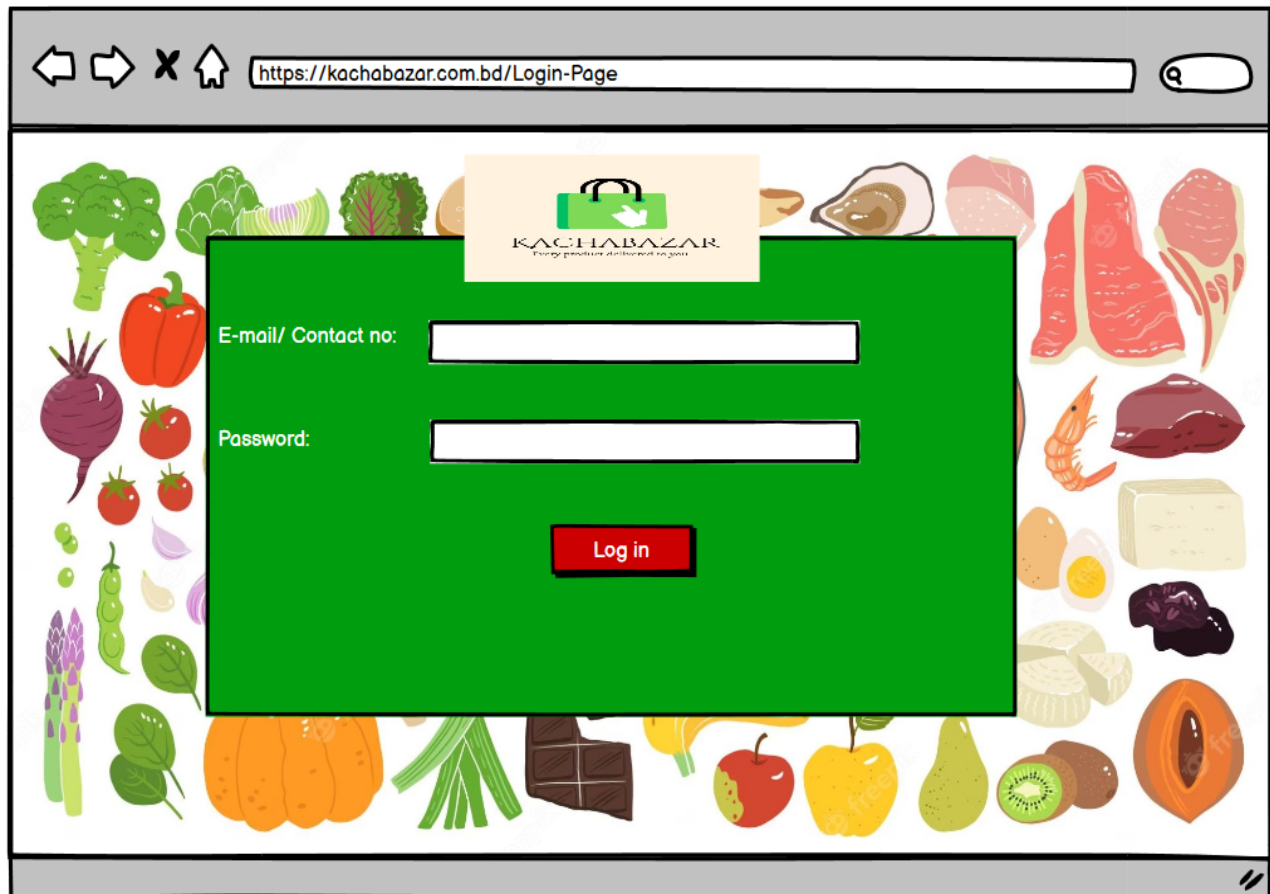

OTP Page

OTP Page: OTP stands for a one-time password. If users register on the Kachabazar page then an OTP code will be generated on their mobile if they register using a contact no and in their email if they use their email address. Users have to enter the OTP within 30 seconds.
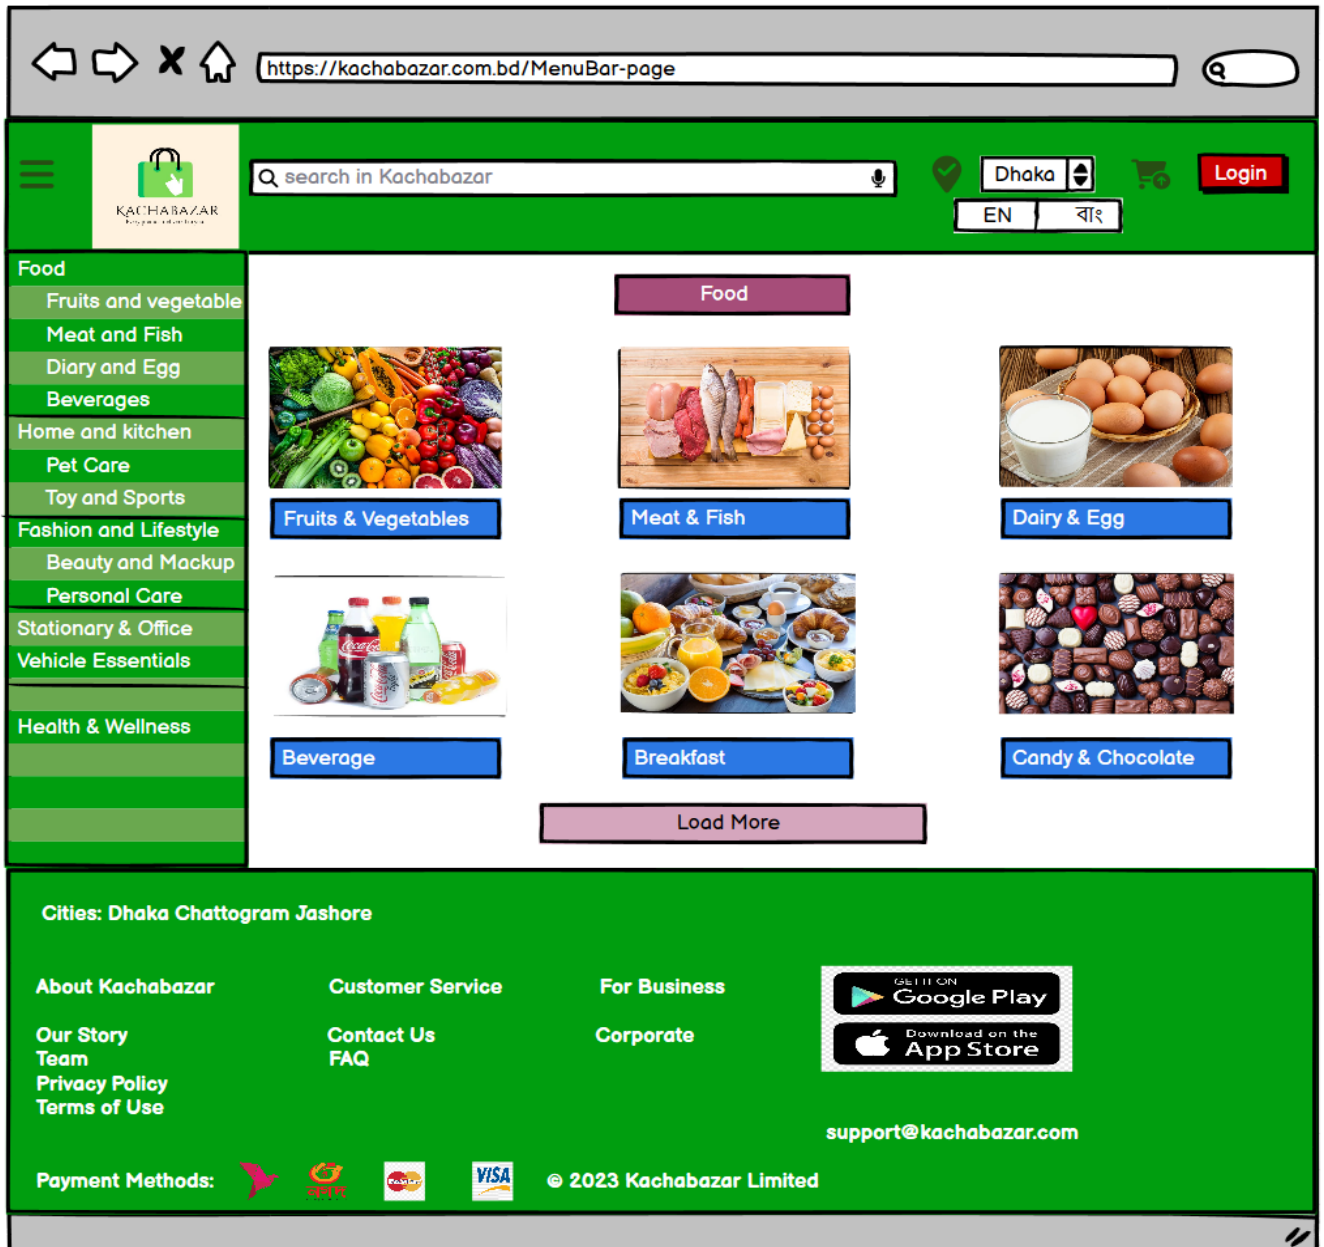

OTP Successful Page

OTP Successful Page: After sending the OTP code correctly from email or mobile message the OTP successful page will come. If the user successfully gives the OTP code then he/she will be able to log in.
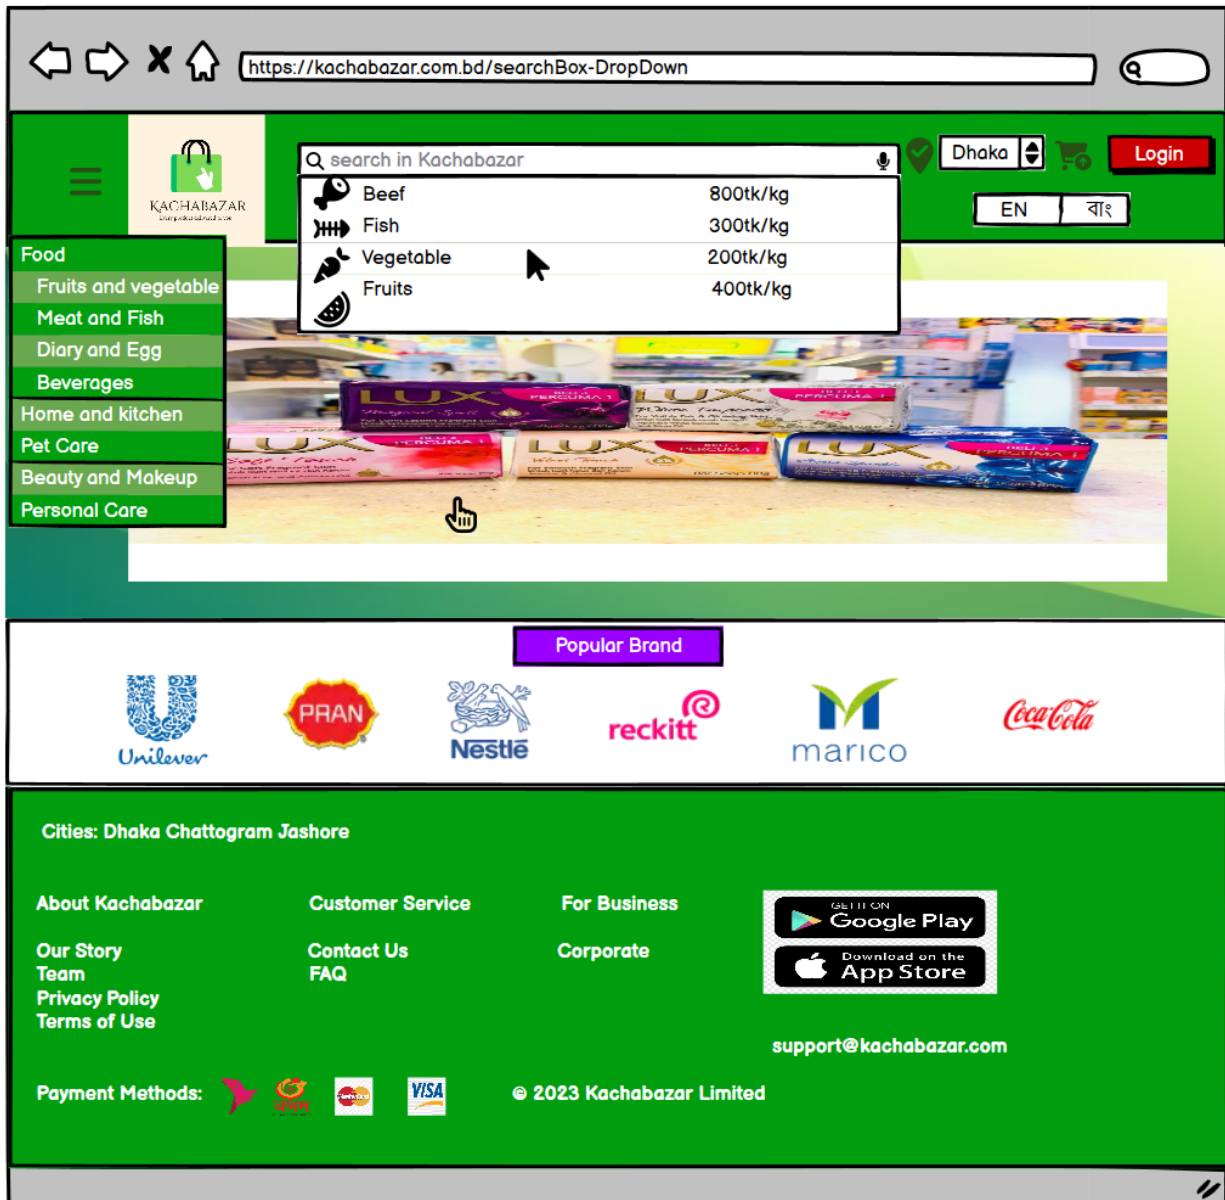

Login page

Login page: After successfully entering the OTP code we could log in to the page. If users register the Kachabazar they can easily log in to the page by using their Email/ Contact no and password. After login successfully, they could go through to the home page.
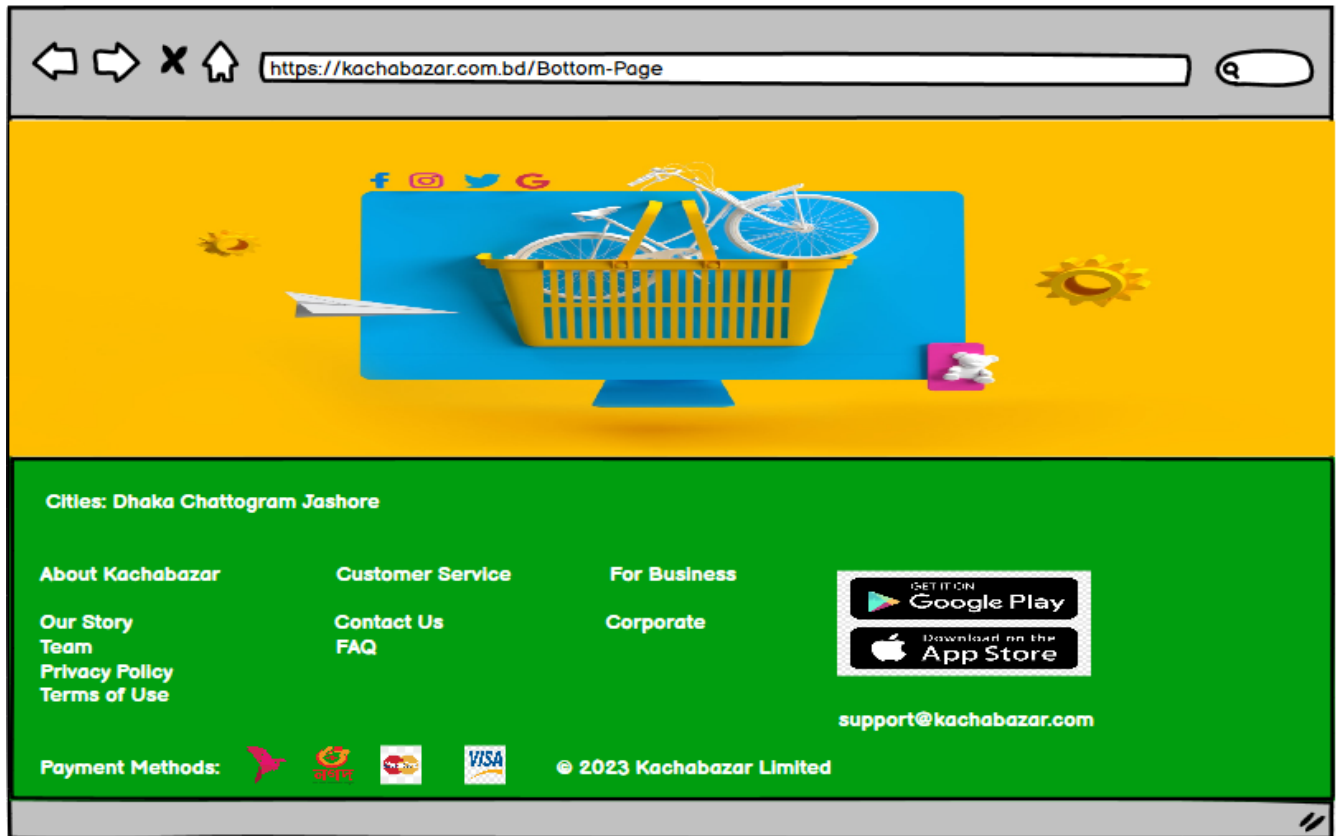

Menu bar-page

Menu bar page: Clicking the expand button, In the Menu bar page will appear. Users could select their respective products. They can see the product, quantity, and individual price. If anyone selects any product then it would be in the cart.

Search Drop Down Page

Search Drop Down Page: In the search bar users could search for their necessary product. There will be a drop-down option where users can pick their product. Search drop-down will be generated by the user's previous history search.

Bottom navigation bar

Bottom navigation bar: At the bottom of the page, these will appear. Cites, About Kachabazar, Our Story, Team, Privacy Policy, Terms of Use, Customer service, Contact Us, FAQ, For Business, Corporate, and the payment method (Bkash, Nagad, Mastercard, Visa) option will appear in the bottom page. We can install this software on our mobile devices in both Android and IOS versions. Our email address: is support@kachabazar.com.
